**QUESTIONS AND ANSWERS:**

Question 1: Can you tell me who the engineer is on these projects and the estimated value?

Answer 1: These projects do not have engineers; they are providing a product not building anything.

Question 2: Is the CO2 being used for the soda fountain and/or for chlorinating the pool water?

Answer 2: The CO2 is being used to stabilize the PH of our pool water; the current company charges us the following, \$599.73 For McDonald Park, \$414.00 for Bucky Dent and \$383.33 for Milander. Tanks are provided by the company, they do all servicing of the equipment and replace if needed. If we change companies, the current company will take all equipment with them (they own equipment), therefore new company will have to provide equipment. The use is stated on the bid under approximate delivery of every facility and the size of the tank, this should give them an approximate use, but the current company charges us a flat monthly fee, not on the use.

Question 3: Do you have any idea what your annual CO2 usage is presently?

Answer 3: Bucky Dent Aquatic Center (2250 West 60 Street, Hialeah FI 33016).  
Tank Size: 400 PSI (2) @ approximately 80lbs of pressure Approximate delivery: Every 7-10 days Operation period: Year-round

Milander Aquatic Center (4800 Palm Avenue, Hialeah FI 33013).  
Tank Size: 400 PSI (2) @ approximately 80lbs of pressure Approximate delivery: Every 7-10 days Operation period: Year-round

McDonald Aquatic Center (7505 West 12 Avenue, Hialeah, FI 33012)  
Tank Size: 600 PSI (1) @ approximately 80lbs of pressure Approximate delivery: Every 7-10 days Operation period: Year-round

Question 4: Is last years winning bid public record and if so, how would I get that information?

Answer 4: Yes. You may contact Carmen in the City Clerk's department 305-883-5824 and request the tab sheet and pricing for bid 2008/09-3130-12-009
